# Subject Index

Amine inclusion compounds 155
Atropisomer separation 283

Calix[4]arene monohemiketal 189
Calix[6]arene
  selective complexation of $UO_2^{2+}$ 169
Chiral macrocycles 69, 81
Chromoionophores 367
Complexation thermodynamics 219
Crown ethers
  azoxy crown 209
  complexes with
    aminosulfuric acid 315
    ammonium complexes 123
    ytterbium nitrate/phenanthroline 267
  18-crown-6 glucose derivatives
    complexing abilities 17
    extracting abilities 17
  di-benzo-14-crown-4 derivatives
    conformational analysis 91
  imine-type 219
  phosphorus crown ether 383
  pyridino 18-crown-6
    MM calculations 113
Cryptands
  chromoionophores 367
  complexes with ammonium salts 123
Cyclodextrin – *alpha*
  complexes with fatty acids 339
  Cu(II) complex 255
  diethylaminoethyl 231
Cyclodextrin – *beta*
  complexes with
    aromatic guests 1
    *cis*-decalin 55
    difenzoquat 255
    dodecylpyridinium chloride 377
    fatty acids 339
    fluorinated alcohols 99
    guaiacol 201
    nicotinic acid 299
    pyrene 99
    terpene guests 1
  Cu(II) complex 355
  diethylaminoethyl 231
  dimethyl
    complexes with
      $C_{60}$ 245
      fatty acids 339
      nicotinic acid 299
  guest selectivity 1
  hydroxypropyl
    complex with fatty acids 339
Cyclodextrin – *gamma*
  chiral mobile phase additive 283
  complexes with
    fluorinated alcohols 99
    pyrene 99
  Cu(II) complex 355

Fluorescence spectroscopy 99, 255, 355

Intercalates of α-zirconium phosphate 329
Ion selective electrodes 63
Ionophores 63
IR spectroscopy 139

Macrocyclic phosphonamides 383
MD calculations 169
MM calculations 55, 113, 169

$^{27}$A1 NMR spectroscopy 139
$^{13}$C NMR spectroscopy
    conformational analysis 93
    2D NOESY 93
    CP MAS 155

$^{19}$F NMR spectroscopy
  CD complexes 99

$^{71}$Ga NMR spectroscopy 139

$^{1}$H NMR spectroscopy
  CD complexes 99
  crown ether complexes 113
  2D NOESY 113

$^{29}$Si NMR spectroscopy 139

Selective hydroxymethylation 201
Sulfonamide cryptands 63
Sulfonamide podands 63
Surface tension measurements 377

Thiamine iodide sesquihydrate 273

Werner clathrates
  selective inclusion by 25

XRD 139

Zeolite omega 139
α-Zirconium phosphate intercalates 329
